SOULFUL TUBES FOR THE STARS

## 12AX7EH

**Forget About Telefunken!** The 12AX7EH provides high gain with ultra low noise and detailed, musical tone that rivals the most desirable NOS types. Unique spiral filament eliminates filament to cathode induced hum common on amps that use AC on the filaments.

## 6V6EH

**Sweet, Singing Tone!** The 6V6EH combines a specially developed cathode coating, careful alignment of the grids and tri-alloy plate material to create a rugged, wonderful sounding 6V6 that performs flawlessly up to 475 volts. Perfect for high plate voltage amps like the Fender Deluxe Reverb™.

## 6L6EH

**Better Than The RCA!** Modeled after the vintage RCA 6L6GC "black-plate," the 6L6EH features larger plate dimensions and improved grid structure for increased power handling capabilities. Also features mica spacers with metal springs to eliminate tube rattle and microphonics. The 6L6EH offers tone and performance superior to any other 6L6 or KT66 type.

## EL34EH

**Mullard Reincarnated!** With the new EL34EH, Marshall™ amp owners can recreate the balanced tone, deep, tight bass, sweet mids, and well-defined highs of the original equipment Mullards. Innovative design and precision construction give the EL34EH exceptionally smooth tone and an ideal balance of pleasing even-order harmonics while virtually eliminating undesirable odd-order harmonics.

Available at leading music stores and service shops throughout the world!

### 6CA7EH

**Classic Integrity!** Designed to the exacting specifications of the Phillips 6CA7. This classic tetrode returns to life in a big bottle design. The 6CA7EH is built to withstand today's high-gain amps while still retaining the detailed tone and component integrity of the original. A direct replacement for any EL34, with military reliability.

### 6550EH

**Perfect Match For The Tung-sol Original!** The 6550EH offers excellent linearity and power-handling capacity with better heat dissipation. Four pillar construction and mica spacers help maintain a rugged mechanical reliability. Classic tone is maintained at a prolonged, high output. A new leaded glass compound is utilized to maintain vacuum integrity, balanced performance and ensure long life.

### EL84EH

**Sweet And Musical!** The new EL84EH faithfully recreates the classic Mullard design. Tri-lam plate material and selected screen wire increase thermal dissipation. The EL84EH is a remarkable reproduction of a vintage tube and is capable of maintaining its sweet and musical tone under any voltage conditions.

### 6SN7EH

**Reborn With Quality!** High quality 6SN7s have virtually disappeared... until now. The 6SN7EH is a beautiful sounding tube, on par with RCA's red base 5692. It maintains a linear response while being able to accept a full voltage. Vintage amp users and audiophiles will be thrilled to find that a superior quality, ultra low noise replacement finally exists.

### KT88EH

**Forget Genelex!** The new KT88EH is here. A new geometry is utilized to reduce odd order harmonics for a sweet top end while the peak power is extended to improve low frequency response. Our new glass formula ensures long life and improved reliability. The perfect choice for authentic sound.

### 5U4GBEH

**Classic Tube Rectifier!** The 5U4GB is found in the most coveted, vintage tube amps. Articulate AC/DC conversion allows the 5U4GBEH, in a traditional glass bottle, to be clean and detailed while maintaining a warm, sweet tube compression. The most desirable and accurate replacement ever built. Used in dual rectifier amps.
